- Trained in the requirements of the SCC

Our areas of application:

- Silo plants
- Dosing systems and mixing plants
- Big-Bag filling and discharging systems
- Filling systems for small containers
- Palletisers with conveyor systems
- Pneumatic conveying systems
- Grinding and sieving plants
- Conveying and dosing liquid media
- Tank storage
- Piping systems
- Individual solutions
- Control systems and process control systems (PLC/PCE)

Industrial sectors: Starch • Milk • Food • Plastics • Chemicals • Pharmaceuticals • Building Materials • Recycling

Services

Our focus is on the installation and service of plants for handling bulk materials and liquid media. We specialise in the installation and dismantling, conversion, service and maintenance of your machines and plants. Our range of services includes field cabling and commissioning.

We are your service partner to carry out all the work reliably and professionally for you. We will be happy to convince you of our capabilities in a face-to-face meeting. Please do not hesitate to contact us. We look forward to hearing from you.

Production

We are ideally equipped to individually produce high-quality stainless steel products in different designs. An additional bonus is our generously dimensioned production area that is continuously being expanded. Modern, state-of-the-art equipment is not just something that we take for granted, but it also essential in order to ensure our high quality standards.

Flexibility, speed and reliability are crucial for our customers. We can be on site in no time at all in order to react flexibly to customers' requirements. Our mobile fleet in the field is ideally equipped to ensure that our team can start to work immediately.

Installation

It is not just essential to have the right equipment to ensure the highest quality for our customers, but also to have highly qualified employees. We therefore place great value on the training and continuing education of our team in addition to practical and comprehensive work experience. This quality philosophy is very important to us so that we successfully keep pace with technical developments and the growing demands. Our employees have the appropriate expertise that we need for our daily work and the associated requirements.

Quality and safety

Our team has undergone occupational safety/HACCP training. It goes without saying that our employees are instructed to observe the respective individual internal regulations of our customers with regard to safety, cleanliness and hygiene

A detailed overview of our services can be found at: www.indu-tech-gmbh.de.
