- Centrifuges (decanter/separators)
- Roller drying systems
- Transport, logistics and storage systems
- Weighing technology
- Water treatment systems (osmosis)
- Waste water and environmental technology

Industries: Starch • Milk • Food • Plastic • Chemicals • Pharmacy • Construction materials • Recycling

Special

With flexible production control and sophisticated promatic GmbH, Neustadt (Dosse) develops automation systems from A to Z. From planning to software development for process control and visualization, all the way to commissioning. In addition to process and production automation, the range also includes building automation. promatic solutions are unique, economical and technologically at the cutting edge. You can rely on our consulting competence at every phase. We take your automation assignments personally, so you can take us at our word.

Services

Each project has its own special features. Our team develops automation solutions that meet your needs. Sound planning and design form the basis for optimal implementation. Our core services include software engineering, process visualization, process control systems and process archiving. Commissioning is included. And once things are up and running, we're still there for you. With our service hotline, remote maintenance by phone and Internet, and for service and repair work.

You can find successful promatic automation solutions in many types of facilities, from decanter systems, dissolving systems to filling and mixing systems with recipe control.

Complete

In addition to our core services in automation, we offer you complete system solutions from a single source. As a member of the endeco Group, we work hand in hand with our partner companies. endeco GmbH is a specialist in planning and implementation of facilities construction. indu-tech GmbH handles professional, on-time assembly. promatic develops automation solutions to put your facility into operation.

Your crucial advantage. During all project phases, you have one central contact who gives you an overall view of the total project and guides you to success.

Quality

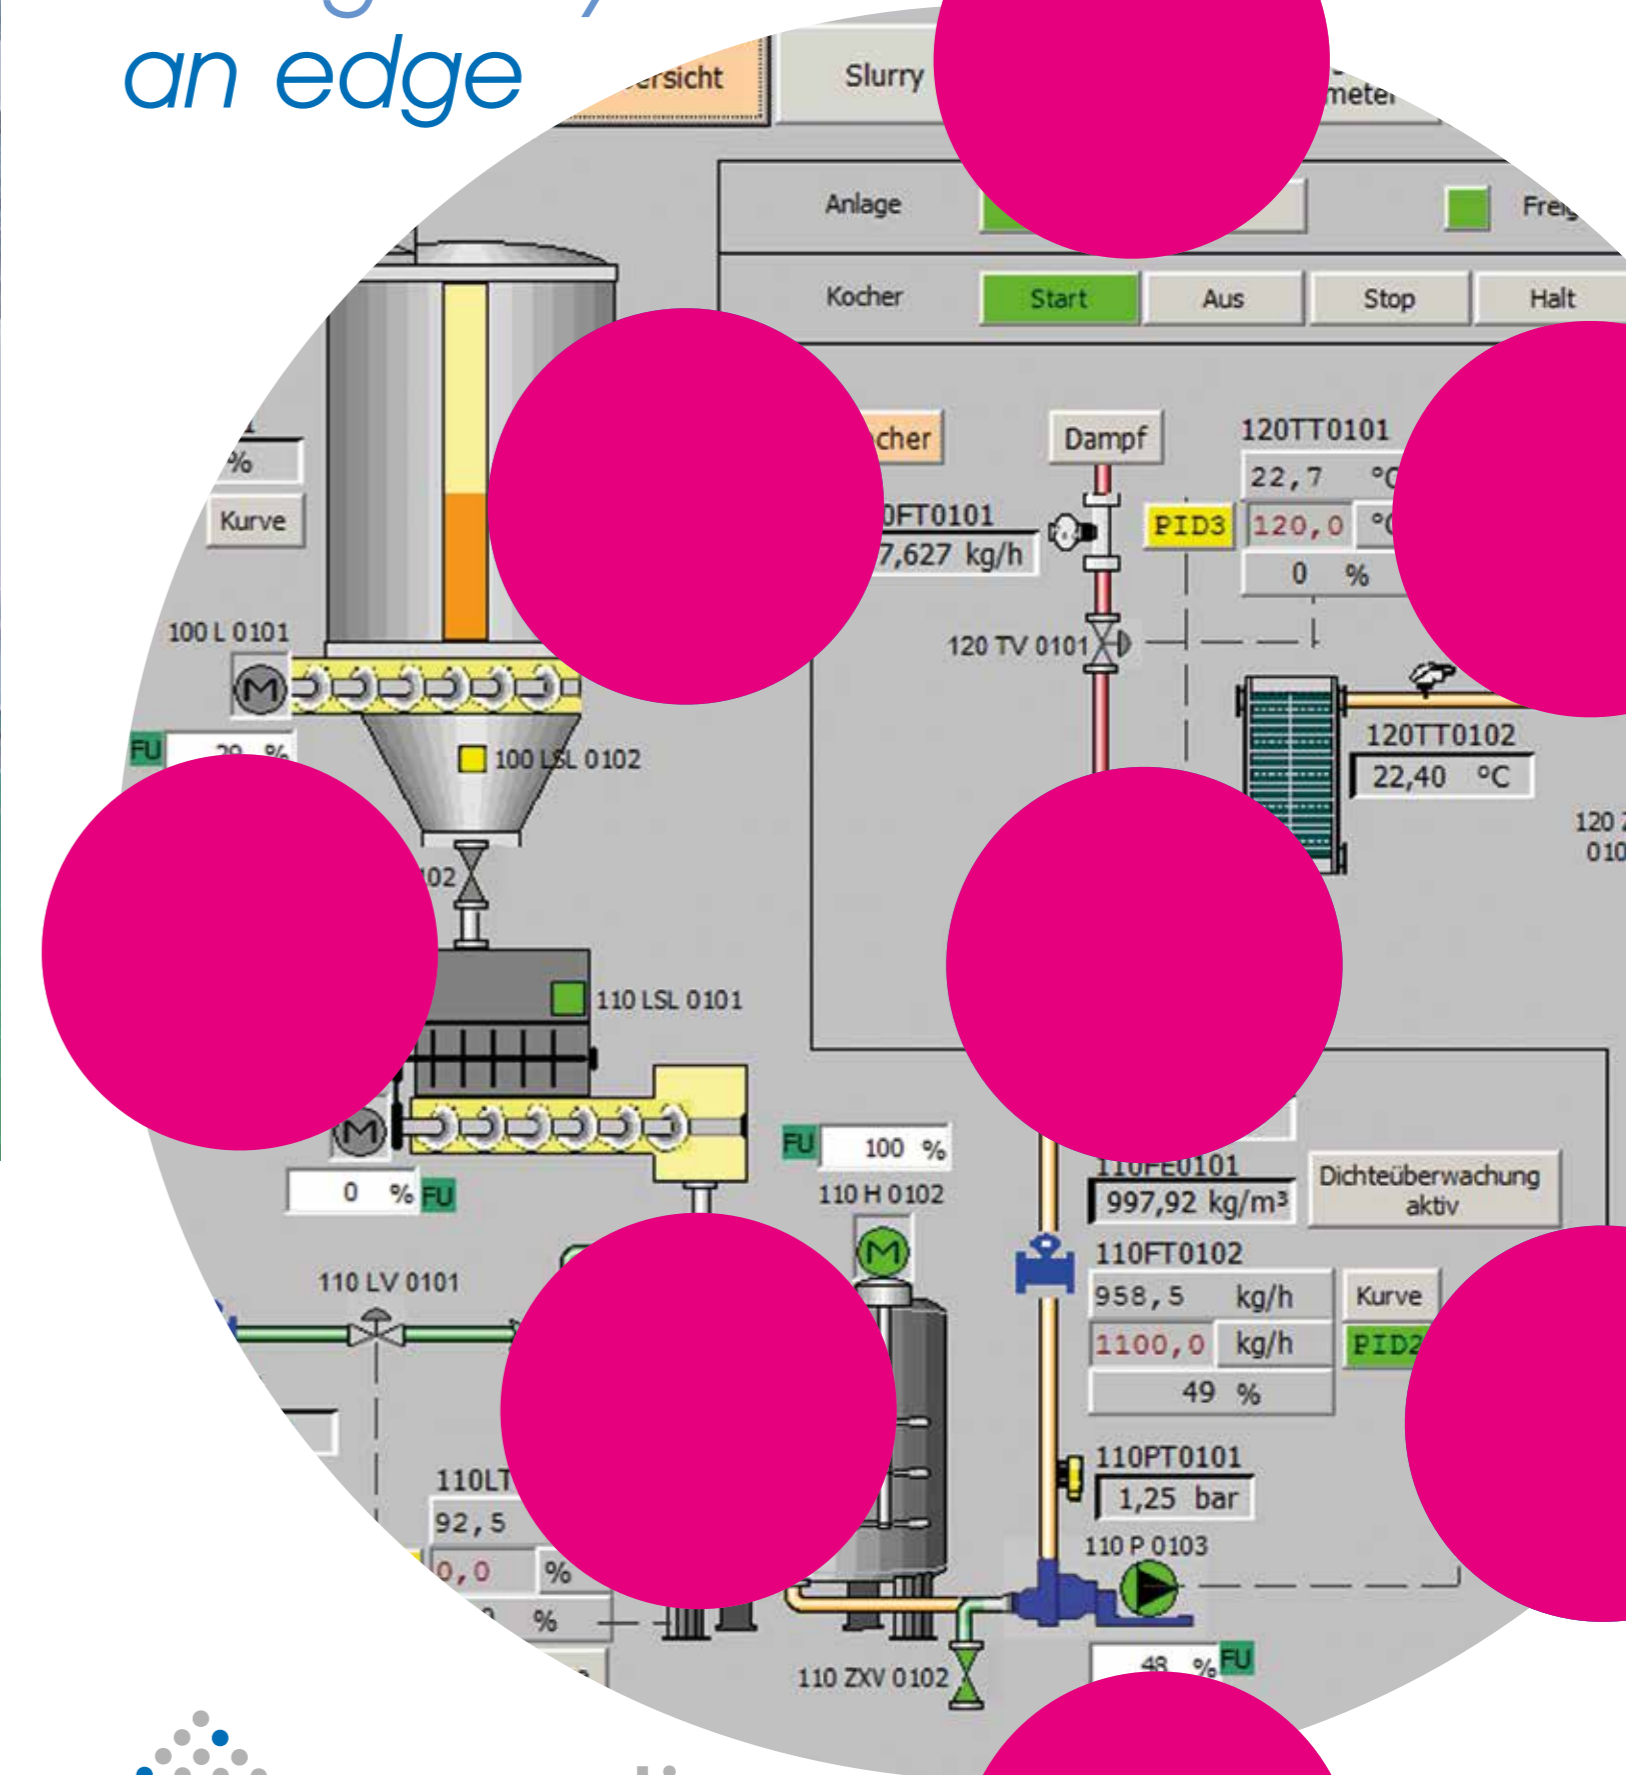

promatic implements its automation solutions with high quality and low cost in mind. For this, we draw on our many years of expertise and our state-of-the-art technological competence. The quality goes beyond commissioning – we stand by you with our technical competence. This lets you concentrate on your core tasks.

promatic GmbH is an official Siemens Solution Partner and is ISO 9001:2015 certified. In daily use, our solutions put customers a step ahead in Germany, the United States, Turkey, Paraguay, Russia, Sweden, Italy and France.
